Jim, Bob & Carl – Here is EPA’s evaluation of DDx. This information is for “discussion purposes only” since these values are all being recalculated based on the TEQ RALs so there may be minor differences. Also, if the LWG/Anchor tries to reproduce, please note that these values are based on dividing the river into sections, interpolating, and then stitching the interpolations back together. So you probably won’t duplicate the exact numbers, but should get close.
